Specific

## Renovation

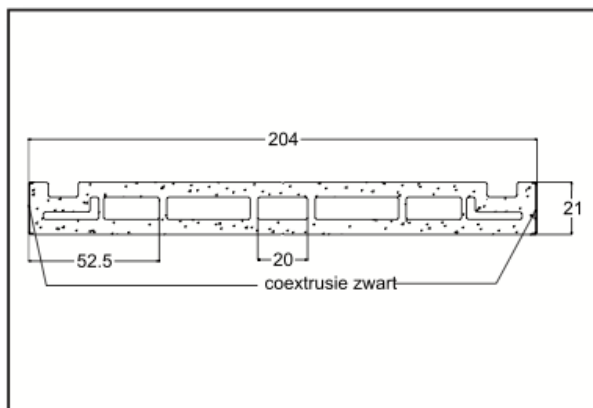

The R-2005 and R-2008 profiles are developed for renovation. The R-2005 profile can be used as a whole or used again when sawn, because there are black co-extrusion edges on both sides. This profile is basically applicable in any situation in renovation because it can be sawn into another shape extremely easily.

The R-2008 is a good supplement to the renovation programme. The advantage of this profile is that the problem of a protruding cavity cleat is a thing of the past, as the R-2008 simply covers this. In addition, the second leg is easily shortened, allowing the thickness of the piecwork to be met.

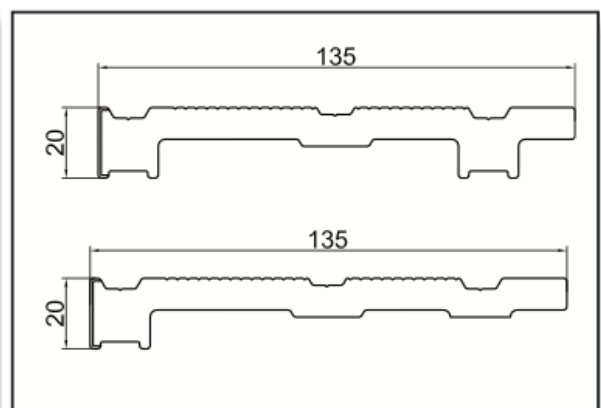

## Technical advantages of renovation profiles

- Produced from 100% recycled PVC.
- Measurement: 21 x 204 mm (R-2005).
- Measurement: 20 x 135 (R-2008).

- In lengths up to 6 metres; 12 metres for the same price in the case of halving.
- Minimum bending, extra strong.
- Easily sawn to size.
- Easy to screw.
- With striking co-extrusion layer.
- Measure in the clear is easily adjusted.
- No strip or diagonal required to finish the crosscut edge.
- 100% water-resistant and does not rot.
